ORDER_PAYMENT API

Orders & Payments REST API · generated from the Postman collection · 22 Oct 2026

Basics

Base URL	{{BASE_URL}}, e.g. http://localhost:8000/api
Auth	Authorization: Bearer {{userToken}} (token from /login or /register, expires in 3600 s)
Body	multipart/form-data. Arrays use items[0][field]. PATCH/DELETE are sent as POST with _method.
Success	{ "status": 200, "success": true, "result": ..., "pagination"?: {...} }
Error	{ "status": 4xx, "success": false, "error": { "message" } or { field: [msgs] } }
Codes	200 OK · 201 Created · 401 invalid credentials · 403 not your resource · 422 validation / business rule
Env vars	BASE_URL, userToken, orderId

Endpoints

Method	Path	Action	Auth
POST	/register	Register	None
POST	/login	Login	None
POST	/refresh	Refresh token	Bearer
POST	/logout	Logout	Bearer
POST	/orders	Create order	Bearer
GET	/orders	List orders	Bearer
PATCH	/orders/{{orderId}}	Update order	Bearer
DELETE	/orders/{{orderId}}	Delete order	Bearer
POST	/orders/{{orderId}}/payments	Create payment	Bearer
GET	/orders/{{orderId}}/payments	List payments	Bearer

Auth

Register `POST /register`

Create an account. Returns a token and the new user.

Param	In	Req.	Notes
name	body	Yes	Display name
email	body	Yes	Unique email
password	body	Yes	
password_confirmation	body	Yes	Must match password

```
{
  "status": 200,
  "success": true,
  "result": {
    "access_token": "eyJ0eXAiOiJKV...",
    "token_type": "bearer",
    "expires_in": 3600,
    "user": {
      "name": "eslam",
      "email": "eslam@gmail.com",
      "updated_at": "2026-10-21T12:42:15.000000Z",
      "created_at": "2026-10-21T12:42:15.000000Z",
      "id": 5
    }
  }
}
```

Errors: **422** The password field confirmation does not match.

Login POST `/login`

Log in with email and password. Returns a token valid for 1 hour.

Param	In	Req.	Notes
email	body	Yes	
password	body	Yes	

```
{
  "status": 200,
  "success": true,
  "result": {
    "access_token": "eyJ0eXAiOiJKV...",
    "token_type": "bearer",
    "expires_in": 3600,
    "user": {
      "id": 3,
      "name": "Test User",
      "email": "test@example.com",
      "email_verified_at": "2026-10-21T12:17:23.000000Z",
      "created_at": "2026-10-21T12:17:23.000000Z",
      "updated_at": "2026-10-21T12:17:23.000000Z"
    }
  }
}
```

Errors: **401** Invalid credentials. · **422** The password field is required.

Refresh token POST `/refresh`

Get a new token for the current one.

```
{
  "status": 200,
  "success": true,
  "result": {
    "access_token": "eyJ0eXAiOiJKV...",
    "token_type": "bearer",
    "expires_in": 3600
  }
}
```

Logout POST `/logout`

Invalidate the current token.

```
{
  "status": 200,
  "success": true,
  "result": {
    "message": "Successfully logged out."
  }
}
```

Orders

Create order POST `/orders`

Create a pending order. Prices come from the server and stock is checked.

Param	In	Req.	Notes
items[n][product_name]	body	Yes	Existing product name
items[n][quantity]	body	Yes	Must not exceed stock

```
{
  "status": 201,
  "success": true,
  "result": {
    "id": 36,
    "status": "pending",
    "total_amount": "779.27",
    "items": [
      {
        "id": 80,
        "product_id": 3,
        "product_name": "Sint et quis",
        "quantity": 1,
        "unit_price": "28.97",
        "line_total": "28.97"
      },
      {
        "id": 81,
        "product_id": 5,
        "product_name": "Quod blanditiis id",
        "quantity": 3,
        "unit_price": "250.10",
        "line_total": "750.30"
      }
    ],
    "user": {
      "id": 11,
      "name": "Test User",
      "email": "test@example.com",
      "phone": "240-495-0984"
    },
    "created_at": "2026-10-21T15:07:02.000000Z",
    "updated_at": "2026-10-21T15:07:02.000000Z"
  }
}
```

Errors: **422** Insufficient stock for "Sint et quis". · **422** The items field is required.

List orders `GET /orders`

List your orders, paginated. Optional status filter.

Param	In	Req.	Notes
status	query	No	pending | confirmed | cancelled
perPage	query	No	Items per page
page	query	No	Page number

```
{
  "status": 200,
  "success": true,
  "result": [
    {
      "id": 16,
      "status": "confirmed",
      "isPayable": true,
      "totalAmount": "1000.40",
      "items": [
        {
          "id": 41,
          "productId": 5,
          "productName": "Quod blanditiis id",
          "quantity": 4,
          "unitPrice": "250.10",
          "lineTotal": "1000.40"
        }
      ],
      "createdAt": "2026-10-21T14:36:00.000000Z",
      "updatedAt": "2026-10-21T14:36:00.000000Z"
    },
    "..."
  ],
  "pagination": {
    "currentPage": 1,
    "perPage": 10,
    "total": 5,
    "lastPage": 1
  }
}
```

Update order PATCH `/orders/{{orderId}}`

Replace the order's items (send the full list). Stock is re-checked.

Param	In	Req.	Notes
orderId	path	Yes	
_method	body	Yes	PATCH
items[n][product_name]	body	Yes	
items[n][quantity]	body	Yes	

```
{
  "status": 200,
  "success": true,
  "result": {
    "id": 36,
    "status": "pending",
    "isPayable": false,
    "totalAmount": "1898.38",
    "items": [
      {
        "id": 90,
        "productId": 6,
        "productName": "Et laboriosam omnis",
        "quantity": 2,
        "unitPrice": "448.99",
        "lineTotal": "897.98"
      },
      {
        "id": 91,
        "productId": 5,
        "productName": "Quod blanditiis id",
        "quantity": 4,
        "unitPrice": "250.10",
        "lineTotal": "1000.40"
      }
    ],
    "user": {
      "id": 11,
      "name": "Test User",
      "email": "test@example.com",
      "phone": "240-495-0984"
    },
    "createdAt": "2026-10-21T15:07:02.000000Z",
    "updatedAt": "2026-10-22T09:19:50.000000Z"
  }
}
```

Errors: **422** Insufficient stock for "Et laboriosam omnis". · **422** The items field is required.

Delete order DELETE `/orders/{{orderId}}`

Delete one of your orders.

Param	In	Req.	Notes
orderId	path	Yes	
_method	body	Yes	DELETE

```
{
  "status": 200,
  "success": true,
  "result": {
    "message": "Order deleted."
  }
}
```

Payments

Create payment `POST /orders/{{orderId}}/payments`

Pay for an order through a gateway (Stripe in the examples).

Param	In	Req.	Notes
orderId	path	Yes	
method	body	Yes	e.g. stripe
currency	body	No	e.g. usd
payment_method	body	No	e.g. pm_card_visa

Errors: **422** Stripe secret key is not configured. · **422** The method field is required.

List payments `GET /orders/{{orderId}}/payments`

List payments for one of your orders, paginated.

Param	In	Req.	Notes
orderId	path	Yes	
perPage	query	No	
page	query	No	

```
{
  "status": 200,
  "success": true,
  "result": [
    {
      "id": 4,
      "orderId": 16,
      "amount": "1000.40",
      "status": "pending",
      "method": "bank_transfer",
      "transactionReference": "f49c6f1e-f4ac-3d13-b898-56daa66eeaf2",
      "createdAt": "2026-10-21T14:36:01.000000Z",
      "updatedAt": "2026-10-21T14:36:01.000000Z"
    }
  ],
  "pagination": {
    "currentPage": 1,
    "perPage": 10,
    "total": 1,
    "lastPage": 1
  }
}
```

Errors: **403** Forbidden.
